You will also hear the wonderful beach of the village of Giannitsi as Limniona, so be careful not to confuse it with Limniona of Mesochori. It is deserted, with thin, black pebbles and crystal clear waters, while it is surrounded on both sides by towering rocks. There, too, a stream flows from the surrounding mountains.

The place is strongly gripped by the north, so when the wind blows, the huge waves create a real spectacle. It is suitable for camping, just make sure you bring everything you need with you because there is only one canteen here. Access is easy and is via a paved road.
