

Archaboli beach

38.091982562834, 24.578508138657

A blindingly beautiful, Cabot and relatively unknown beach with a "Cycladic" aesthetic, fine, white sand and blue waters, nestled in a cove and surrounded by bare, imposing rocks. The Archamboli gorge ends here, which starts from the heights of Ochi along with its torrent. From the small church of Agios Georgios, in fact, and the view of the sea, with the eye reaching to Andros. Next to it you will also see the ruins of an ancient settlement, which was inhabited continuously from the 8th to the 1st BC. century.
