

Seychelles Beach Ikaria

37.559283908995, 26.140476465225

The most exotic beach and one of the best on the island. For many, one of the best beaches in the entire Aegean. It is a landscape that refers to exotic paradises, as its name indicates. It was created several years ago by rockslides during tunneling to create a road to and from the village of Magganitis.

It is an "exotic" beach, as its name suggests, its blue waters, white sand and the impressive rocks that surround it, make up an idyllic environment!

The beach has mixed fine pebbles and sand and is not organized. It has many underwater caves next to the beach waiting to be explored. Ideal for couples and young people.

Secret! Don't forget your mask for diving in the bottom of the sea and dives from the granite rocks!

Access

You leave the car on the main road in an outdoor parking lot. Access to the beach is only on foot after about a 7 minute walk from the main road, through a difficult path and descent.
