

Red beach

Red beach Santorini

36.34883525, 25.394120619019

The Red Beach of Santorini is renowned for its beauty and is often regarded as one of the most magnificent beaches in Greece. It is located close to the Akrotiri archaeological site and can be reached by car, on foot or by boat.

Those who don't wish to walk down have the option of admiring the red and black volcanic rocks from the headland. As you make your way down the path, you will be amazed by the different colors of the cliff. The beach is outfitted with numerous sunbeds and umbrellas, and snorkeling is highly suggested due to the amazing underwater rock formations.
